neo smart-slide

Operation

Easy opening is achieved by turning the handle clockwise from the locked position. When opened, the sash is lifted away from gaskets and allows it to slide with minimal force.

The sash can be partially opened and locked in any position by rotating the handle 180 degrees for example, to provide greater ventilation. To fully lock, turn the handle anti clockwise and once locked, the door is secured around the perimeter, ensuring exceptional performance and security.

Slim profile sightlines ensure expansive glass coverage, enhancing the feeling of spaciousness while seamlessly blending indoor and outdoor spaces. An optional soft close mechanism automatically slows the door to the frame in a quiet and gentle motion.

Colour Options

All Aluplast, Aludec and Woodec coloured foil finishes feature innovative "Cool-Colour Technology." These special patent-protected pigments considerably reduce the surface temperature of coloured foil finished profiles, enhancing performance characteristics of the surface finish.

Woodec

Woodec illustrates the appearance of real wood with a unique character combined with all the advantages of our excellent product range.

Woodec also realistically recreates a wood surface visually and to the touch, thanks to deep embossing and a matt top layer.

Sheffield Oak Alpine

Sheffield Oak Concrete

Turner Oak Toffee

Turner Oak Malt

Turner Oak Walnut

Turner Oak Amber

Aludec

The attractive surface of Aludec decorative foils, distinguished by a unique fine-grained matt surface with a similar finish to powder coated aluminium.

Aludec is a fabulous option that suits contemporary modern minimalist design.

Anthracite Grey

Basalt Grey

DB703 (Dark Grey)

Jet Black

Quartz Grey

Traffic White

Umbra Grau

We offer 46 different colour options including woodgrain, smooth and textured foils with lead times of 15 days on standard colours.
