aero-slide

Operation

aero-slide achieves market leading U Values, ensuring warmth in the winter and coolness in summer, helping to reduce energy bills while fully complying with stringent building regulations and performance standards.

The system is engineered with reinforced seals and innovative drainage, keeping your home dry, protected, and consistently comfortable throughout the year.

It is tested to PAS 24 for security, using high-strength profiles that deliver proven resistance to forced entry, enhanced durability, and assured full weather tightness in all conditions.

Colour Options

All Aluplast, Aludec and Woodec coloured foil finishes feature innovative "Cool-Colour Technology." These special patent-protected pigments considerably reduce the surface temperature of coloured foil finished profiles, enhancing performance characteristics of the surface finish.

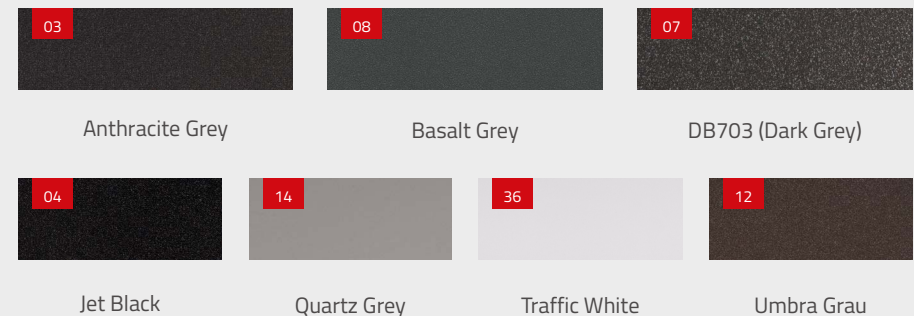

Woodec

Woodec illustrates the appearance of real wood with a unique character combined with all the advantages of our excellent product range. Woodec also realistically recreates a wood surface visually and to the touch, thanks to deep embossing and a matt top layer.

Aludec

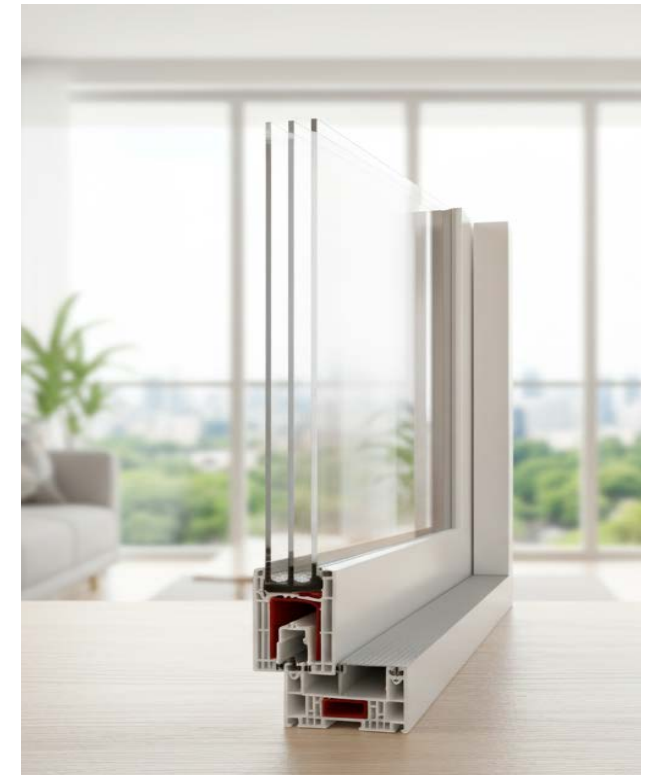

The attractive surface of Aludec decorative foils, distinguished by a unique fine-grained matt surface with a similar finish to powder coated aluminium. Aludec is a fabulous option that suits contemporary modern minimalist design.

Stock Colours

Other colours available to order as per the Aluplast colour swatch book
